

AM: Order rational numbers

1. Insert =, <, or > to make a true statement: $-\frac{1}{4}$ ☒ $-\frac{1}{3}$

[A] >

[B] <

[C] =

[D] none of these

LO: If you place $-\frac{1}{3}$ and $-\frac{1}{4}$ on a number line the number $-\frac{1}{4}$ is on the right. This means the inequality can be written as $-\frac{1}{4} > -\frac{1}{3}$.
